Setting method

Please refer to the instruction manuals for details

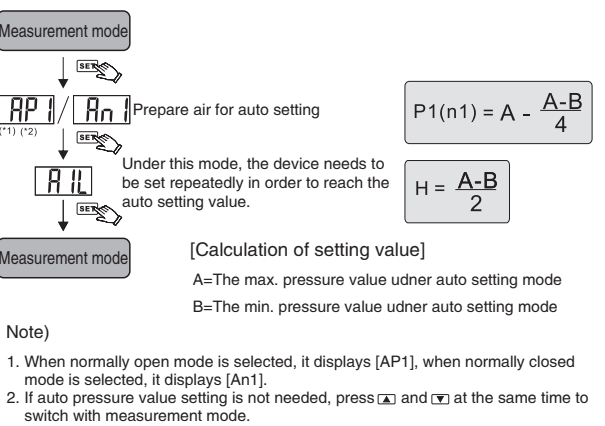

Initial settings mode

Manual settings

Auto setting mode

Other settings

① Zero reset setting:

Press Δ and ∇ at the same time until the "00" is displayed.
Release the keys to end the settings.

② The MAX. value display mode

Keep pressing Δ for 2 seconds to enter the MAX. value mode.
Pressure sensor will detect the MAX. value and keep display.
Press Δ for 2 seconds to return to measurement mode.

③ The MIN. value display mode

Keep pressing DOWN ∇ 2 seconds to enter the MIN. value mode.
Pressure sensor will detect the MIN. value and keep display.
Press ∇ for 2 seconds to return to measurement mode.

④ Fine adjustment mode

This function eliminates sight differences in the output values and allows uniformity in the numbers displayed. Displayed values of the pressure sensor can be calibrated to within $\pm 5\%$ for MPS-P34/MPS-R34 and $\pm 2.5\%$ for MPS-V34.

Note)

MPS-P34: When display unit is in Mpa, setting resolution is 0.001MPa.
MPS-R34: When display unit is in kpa, setting resolution is 1kPa.
MPS-V34: When display unit is in kpa, setting resolution is 0.1kPa.
